Important Health Warning About Playing Video Games

Photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these “photosensitive epileptic seizures” while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

BASIC SERVE

Toss the ball into the air by pressing , or depending on the type of serve you want. The duration of your button press varies the power of the swing. Release the button to deliver the serve.

NORMAL SERVE Tap , or .

POWER SERVE Press and hold , or until the ball is at the top of the toss, then release.

Use to aim the serve. Learn to control how long you hold in the aimed direction to avoid hitting out or into the net.

ADVANCED SERVE

Use to perform an advanced serve:

1. Pull to toss the ball.
2. Wait to time your shot with the top of the toss, then push for flat serve, for a slice serve and for a top spin serve.

Serve Timing Display

SERVE TIMING DISPLAY

When you perform a Power serve or an Advanced serve, the timing of the release is very important. The perfect timing is when the ball is at the peak of its trajectory. The timing display helps you deliver accurate serves. When activated, it appears after you hit the serve and grades your swing. Check your grade after a serve to get a feel for what timing constitutes a perfect serve.

To activate the timing display, select **In-game Helpers** from the Main Menu's Options menu or the in-game Pause menu and set the **Timing Display** option to **Activate**.

SHOT TYPES

BASELINE SHOTS

FLAT SHOT ()

Use the flat shot to perform powerful, straight swings. Practice holding to charge up to a full power meter for maximum effectiveness.

TOP SPIN ()

A Top Spin shot allows you to put a lot of direction on the ball but still perform a very fast shot. The forward spin on the ball means it will drop towards the ground quicker than a flat shot and also bounce higher. A Top Spin shot is most effective for cross court shots when you are attacking. You can also use a Top Spin shot defensively too as the high bounce makes it difficult for your opponent to return the ball.

SLICE ()

A Slice shot is the opposite of a Top Spin shot. The backwards spin means the ball travels low over the net and will also result in a very low bounce. The slow speed of the ball means a Slice is a very effective defensive shot as it allows you time to reposition yourself before your opponent can return the ball. You can also use it offensively if you wish to rush the net as it gives time to get into position and prepare for a volley.

SPECIAL SHOTS

LOB ()

When you catch an opponent close to the net, use a lob shot to send the ball over his or her head. Be watchful, because your opponent may get behind this shot and return it as an overhand smash.

DROP SHOT (+)

+ away from net

The drop shot delivers the ball close to the net, forcing your opponent to dash from the baseline to attempt a return.

PRO TIP Here's a good strategy for rushing the net: hold , hold to prepare a slice shot, use to aim your shot, then release . Your slice gives you time to reposition, and moves you toward the net quickly, ready to meet your opponent's return shot.

SWING

To execute a swing:

1. Use to position your player for the shot.
2. Press and hold , , or .
3. Release the shot button to swing while aiming your shot with .

Button press duration affects the power of the swing:

NORMAL SHOT Normal shots are the basic shots a player can perform. They don't have any particular strength or weakness.

CONTROL SHOT To finesse a shot for precision placement, tap a shot button. Power is sacrificed for precision.

POWER SHOT A long press and hold delivers a powerful shot. This shot is more susceptible to going out or into the net if you have bad timing.

PRO TIP When pressing and holding your shot, release the shot button at the moment when your player should begin his or her swing for the best timing. Sooner is always better than later!

VOLLEY

To engage in a volley:

1. Use **L** to aim.
2. Quickly press and release a shot button: **A** (normal volley), **B** (power volley) or **X** (control volley). The press and hold duration doesn't matter when performing a volley; only timing does.

SHOT TIMING DISPLAY

Shot Timing Display

Shot quality is affected by the timing of a shot button release. Wait too long to release a shot button and quality suffers. When activated, the **timing display** appears when you release a shot button and grades your swings. Check the timing display to learn to adjust your timing for perfect shots. It's always safer to release a shot button too early rather than too late!

PRO TIP Try to release the shot button around the time when the ball bounces on your side of the court. It's a good starting point to learn correct timing.

Take time to investigate a coach before finalizing the hire. Check out his or her specialty on the Coach Page to get an indication of what you will learn. Work with the coach you hire for as long as you think he or she is effectively helping. When your player seems to have gone the distance with one coach, or you don't see improvement in your chosen strategy, move on.

STEREOSCOPIC 3D

3D mode in **Top Spin 4** features a 3D-specific camera that enhances Singles matches. The camera uses default 3D distortion settings that are comfortable for most users. You can use the Distortion slider, available in Practice Ground or from the Main Menu, to adjust the 3D distortion level. This can help reduce the amount of visible ghosting, and tailor the 3D "effect" to your liking.

CAUTION Some people may experience discomfort (including eye strain, eye fatigue, or nausea) while watching 3D video images or playing stereoscopic 3D games on 3D televisions. If you experience such discomfort, you should immediately discontinue viewing and/or playing the game until the discomfort subsides.

- We recommend that viewers take regular breaks while watching 3D video, or playing stereoscopic 3D games. The length and frequency of necessary breaks may vary from person to person.
- Take breaks that are long enough to allow any feelings of discomfort to subside. If you experience serious discomfort or pain or if symptoms persist, stop gameplay immediately and consult your doctor.
- Be sure to review and comply with safety warnings and instructions supplied with your 3D television and 3D glasses.

If for any reason you find a defect in the storage medium or Software during the warranty period, Licenseor agrees to replace, free of charge, any Software discovered to be defective within the warranty period as long as the Software is currently being manufactured by Licenseor. WHETHER OR NOT LICENSEOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN

NO EVENT SHALL LICENSEOR'S LIABILITY FOR ALL DAMAGES (EXCEPT AS REQUIRED BY APPLICABLE LAW) EXCEED THE ACTUAL PRICE PAID BY YOU FOR USE OF THE SOFTWARE.

THIS WARRANTY SHALL NOT BE APPLICABLE SOLELY TO THE EXTENT THAT ANY SPECIFIC PROVISION OF THIS WARRANTY IS PROHIBITED BY ANY FEDERAL, STATE, OR MUNICIPAL LAW, WHICH CANNOT BE PRE-EMPTED. MISCELLANEOUS: This Agreement represents the complete agreement concerning this license between the parties and supersedes all prior agreements and representations between them. It may be amended only by a writing executed by both parties. If any provision of this Agreement is held to be unenforceable for any reason, such provision shall be reformed only to the extent necessary to make it enforceable and the remaining provisions of this Agreement shall not be affected.

GOVERNING LAW. This Agreement shall be construed (without regard to conflicts or choice of law principles) under the laws of the State of New York, as such law is applied to agreements between New York residents entered into and to be performed within New York, except as governed by federal law. Unless expressly waived by Licenseor in writing for the particular instance or contrary to local law, the sole and exclusive jurisdiction and venue for actions related to the subject matter hereof shall be the state and federal courts located in Licenseor's principal corporate place of business (New York County, New York, U.S.A.). Both parties consent to the jurisdiction of such courts and agree that process may be served in the manner provided herein for giving of notices or otherwise as allowed by New York state or federal law.
